

Release Notes frogblueHome 1.3.4

#ReleaseNotes #frogblueHome

After the update from frogOS 1.2.x, please check for correct function of the scenes that contain one or more shutters.

In order to initially display the correct position status in the frogDisplay or the frogblueHome on the smartphone/tablet, it is recommended to move all shades once to both end positions.

New functions

- Position movement of shades and slats (long click on single shade)
- Parameters (dimming value and position) can be specified in messages in a scene
- Selection of type messages in scenes possible

Improvements

- Sending of messages for scenes with many devices improved
- Heating settings accessible via room view
- Additional icons for scenes
- Changed layout for start screen
- Home button fixed in menu bar
- Added languages Slovenian, Croatian and Arabic

Bugfixes

- No or delayed display of temperatures during remote access
- Door symbol not visible if only garage or door available
- No remote access after factory settings and loading a backup from the display
- Empty project after remote loading from display
- Use of favorites not possible with limited room rights
- Correct display of globe and WLAN icon
- Empty project after "Load remote" from frogDisplay

- Incorrect user rights in lamp and shading view
- Change of icon for a scene is not displayed immediately
- New scene is not displayed immediately if another page is created
