

Release Notes frogblueProject 1.7.6 & frogware 1.7.3.33

#ReleaseNotes #frogblueProject #frogware

Bug fixes

- Changing the project overwrites the project in rare cases
- Possible crash when configuring a frogDisplay
- Text in the shading wizard outside the window
- Exported project cannot be changed
- LED output of frogMotion cannot be deleted
- Android11: Access to frogware file not possible
- Replacing a unit shows "Config update necessary" permanently
- "Switch off after" time not set for entry "value"
- Leap year calculated incorrectly
