

frogblue – the next generation of Bluetooth-based systems for intelligent living. We are recruiting new staff at our headquarters in Munich and at the Kaiserslautern branch. If you're looking for a challenging role in the field of smart building technologies that will demand your entire expertise and commitment, you've come to the right place. We currently have a vacancy for a

Hardware Developer for Embedded Systems

in Kaiserslautern

Your tasks

- > Upgrading our in-house automation products
- > From the design, creation, circuit diagram, EMV-compatible layout up to series production

Your profile

- > Degree in electrotechnology or a similar qualification in hardware development
- > Knowledge of EDA programs (e.g. Altium Designer)
- > At least 2 years of professional experience
- > Independent and structured way of working

We offer

- > A performance-related salary
- > Excellent benefits
- > A job in an innovative environment
- > Creation of high-tech products
- > Modern office
- > Good public transport links
- > Very interesting responsibilities with room for creativity
- > An international working environment in a dynamic growth market
- > Close collaboration with national and international specialists within an internationally active high-tech company
- > Open and friendly working atmosphere in a professional environment
- > Excellent prospects from our success story

You work well on your own and are an even better team player. You strive for results and have a genuine "hands-on" mentality. Critical situations spur you to give your all.

Could this be you? Would you like the opportunity to help a young company grow and help shape its character? Very good, then please send your full application to the address below, mentioning the reference number 23017.
