

## Release Notes frogOS • Version 1.6.32 • 15/10/2025

#ReleaseNotes #frogOS #frogTerminal #frogStation #frogDisplay

**Note: Display, Station, and Terminal share the same firmware.**

### New Features and Improvements

- **User Interface**
  - Improved UI scaling and layout handling for smaller screens and tablets.
  - Enhanced Header and Sidebar behaviour for a better experience across devices.
- **SIP and Video Communication**
  - Enhanced compatibility with a wider range of SIP phone models.
  - Improved early video initialisation for faster call setup and stream stability.
  - General SIP protocol optimisations for higher reliability in mixed environments.
- **Image Recording**
  - Optimised input event and recording processing for smoother and more stable operation.
- **Input Events and System Performance**
  - Improved trigger handling and system response.
- **Network and Connectivity**
  - Improved network interface resilience in low-bandwidth or high-latency conditions.
  - Enhanced handling of reconnects and network timeouts for long-running sessions.
- **Kernel Update**
  - Updated from frogKernel to V6.7.10-v9, bringing security patches, updates, and stability enhancements.

---

### frogSIP 1.2 Feature Support

frogOS 1.6.32 adds support for the new frogSIP 1.2 App, available on the Apple App and Google Play Stores.

- **New App features enabled by this firmware include:**
  - Configuration and management of Bell Buttons, Function PINs, and Key Access Control Settings (codes, zones, sources, Auth Call, etc.).
  - Ability to trigger Function PINs remotely via the App.
  - Direct control and monitoring of multiple doors and entry points from a single interface.

---

### General Enhancements

- Performance optimisation.
- Improved internal logging and diagnostic capabilities for service and support.
- General system stability and security improvements.
