

Release Notes frogOS • Version 1.6.36 • 24/11/2025

#ReleaseNotes #frogOS #frogTerminal #frogStation #frogDisplay

Note: Display, Station, and Terminal share the same firmware.

Overview

frogOS 1.6.36 is a minor stability release focusing on improved SIP compatibility, refined audio behaviour, and more reliable call event handling. It includes incremental quality improvements based on field feedback and internal testing.

Improvements

- SIP Communication
 - Improved compatibility with a broader range of third-party SIP devices and PBX systems.
- Audio Performance
 - Minor tuning and improved stability.
- Call Event Handling
 - Optimised event and call processing for smoother and more stable operation.

General Enhancements

- Small performance optimisations.
- General system stability improvements.
