|                          | frogblueProject<br>Is the configuration app for the installer or system integrator who programs frogblue's Bluetooth®-based Smart Building solution with a tablet or a PC. The app is available for free in the AppStore and PlayStore for iOS and Android!  |           |         |         |        |            |                 |                    |          |                |               |                                |                    |                   |          |              |                 |                     |             |            |                  |                  |                      |          |                             |                                     |              |                 |               |                    |                |                 |                 |  |  |
|                          | frogblueHomeApp<br>Is the intuitive app for controlling the Bluetooth®-based Smart Building solutions from frogblue. Whether it is lighting, shading, heating, access or an alarm system, this app enables you to control everything from your smartphone/tablet. The app is available for free in the AppStore and PlayStore for iOS and Android! |           |         |         |        |            |                 |                    |          |                |               |                                |                    |                   |          |              |                 |                     |             |            |                  |                  |                      |          |                             |                                     |              |                 |               |                    |                |                 |                 |  |  |

### Indication

|    |   |
|----|---|
| ■  | Main product to realise the desired application   |
| ■  | Optional products   |
| ■  | Integrated functionality  |
| *  | The integration into the frogblue system is quite easy via free input channels on our frogs. For this purpose, all sensors that switch 230V or have a potential-free switching contact can be used.   |
| ** | The frogLink has two different operating modes:<br>1. <b>frogblue Mode:</b> Use of the frogLink as a Bluetooth® communication interface to configure and operate with a Windows computer<br>2. <b>Text Mode:</b> Our frogLink can be used in a text mode as a serial text gateway (ASCII or JSON) to integrate frogblue with and into other systems, e.g. Apple HomeKit, Siri, Amazon Alexa, Google Assistant or Philips Hue. |
